Shawn Lorrigan
Senior Systems Engineer
KAB Laboratories
9242 Lightwave Ave. Suite 100
San Diego, CA 92123

Dear Mr. Lorrigan,

I am writing to apply for the position of Software Engineer II as advertised on Glassdoor.com, for which I have enclosed my up-to-date resume.

I have developed an excellent understanding of a wide range of programming languages and tools that demonstrate my capabilities throughout my ongoing education at Washington State University (WSU). I'm a Computer Science major on the Software Engineering track and will have my degree in December of 2018.

While pursuing my education, I've had the opportunity to participate in many team environments. Since 2016, I have served as a research assistant for WSU, where I have been repeatedly recognized for developing innovative solutions for Wireless Sensor Network (WSN) which is part of WSU Air Quality Network (AQNet) research project, regional deployed software and systems. I am responsible for full lifecycle software development, from initial requirement gathering to design, coding, testing, documentation and implementation.

My experience in team-oriented courses has enabled me to consistently deliver projects on time, with a focus on completing every requirement. For this reason, I have been recognized for my ability to work effectively as part of a team. These courses also helped me to establish my technical expertise including cross-platform proficiency (Windows, Unix, and Linux); fluent 7 scripting/programming languages (C, C++, Python, PHP, HTML, CSS, and SQL); and advanced knowledge of developer applications, tools, design patterns, methods, and best practices (including OOD, client/server architecture, and agile development methods).

I am sure after review of my resume you will see I am an individual with excellent potential in an organization such as KAB Laboratories. In addition to the skills listed, I also have an excellent work ethic, personality and tenacious attitude.

I look forward to hearing from you and thank you for your time and consideration.

Sincerely,

Nathan Scott
